STUDENTS...I NEED YOUR INPUT!!

*Please* answer the following questions honestly so that I can improve my performance as a math professor.

1. What barriers in your life (overextended schedule, bad math background, math phobia, math test anxiety, etc.) keep you from excelling at math?

2. What can *you* do differently to help you do better at math?

3. What can *I* do differently to help you do better at math?

Do you think the number of class absences a student has should negatively affect his/her overall course grade? *PLEASE* explain.
Do you think assigning Online Homework and counting it toward the overall course grade is a good idea? PLEASE explain.

If you have received math tutoring from ECC (Learning Center, MESA, STEM, EOF, etc.) this semester, please identify the tutoring source and briefly describe your experience.

Do you think using your cell phone to send/receive texts or surf the net while in class is a problem? PLEASE explain.

How can I get students to stop sending/receiving non-emergency texts/calls or surfing the internet in class?
